

## THE QUEEN'S GREEN CANOPY "TREE OF TREES"

The Queen's Green Canopy is proud to invite you to become part of the living legacy in honour of Her Majesty The Queen through the presentation of this British grown tree from the "Tree of Trees". As a centrepiece of Her Majesty's Platinum Jubilee weekend celebrations, the Tree stood tall as a message of hope, regeneration and optimism to our nation and the world. The living sculpture put the importance of trees at the heart of the historic milestone to celebrate The Queen, who planted over 1,500 trees throughout the world during her 70- year reign. We are pleased to gift this special tree set in a pot embossed with Her Majesty's cypher to your organisation in recognition of the vital contribution that you make to your community, and as a symbol of a greener environment for the future in the United Kingdom. We hope this tree, in The Queen's name, will serve as inspiration for tree planting within your communities and to encourage care for the trees which already exist as part of our nation's stunning landscape. This tree joins over a million trees already planted as part of The Queen's Green Canopy, which aims to create a legacy to honour Her Majesty's extraordinary service to her country and to her people. At the end of the first planting season, The Queen sent a message to thank people all over the United Kingdom who came together to plant trees in her name. We wish you well as custodians of this special tree and we hope everyone within your community can enjoy and nurture it.

**WINDSOR CASTLE**

As the planting season draws to a close, I send my sincere thanks to everyone across the country who has planted a tree to celebrate my Platinum Jubilee. I am deeply touched that so many community groups, schools, families and individuals have made their own unique contributions to the Green Canopy initiative.

I hope your Jubilee trees flourish and grow for many years to come, for future generations to enjoy.

**ELIZABETH R.**
